SUBJECT: Telephone Call - Environmental Protection Agency (EPA) - Feb. 28, 1992

[handwritten notes: Bob Kulal 2cs]

[handwritten: (333) 3/10/92 Asked Karl Tyminski to locate MSD policies (for 1981 and 1982]

Late afternoon on Friday, February 28, 1992, I received a call from Mr. Greg Reesor who identified himself as a project manager with the Environmental Protection Agency (EPA) in Kansas City (913-551-7695). The EPA in Kansas City had received a call from Congressman Clay's office relative to asbestos in Maline Creek.

The following is a summary of the conversation:

- 1979 - EPA issued an order under the Authority of the Clean Water Act to the GAF Corporation (9215 Riverview) and Certin-Teed Company (600 St. Cyr Road) to bury asbestos waste on site. EPA believes Certin-Teed contributed monetarily to the clean-up. An area along the banks of Maline Creek was graded and rip-rapped. An adjacent section of the creek bank was left unabated. EPA felt, at that time, brush and other cover would prevent asbestos from becoming air-borne.

- 1/82 - At a time later (Jan. 1982) MSD in a creek cleaning project exposed the asbestos in the unabated section of creek bank.

- 5/82 - MSD agreed with either EPA and/or DNR to clean-up exposed asbestos.

- 8/82 - MSD's contractor Zykan, Inc. hauled exposed asbestos to West Lake Landfill.

Mr. Reesor said he would send me a copy of a report filed in their office. He also asked if we would send him any information we have relative to the asbestos clean-up in the area. We will look through our files for any information on the clean-up.

I am aware of the creek cleaning project in Maline Creek through Bellefontaine Neighbors. I am not, as of this writing, familiar with the asbestos clean-up by Zykan, Inc.
